

## Why I bought an Electric Vehicle

"I like that I can use my solar electricity to charge my vehicle and that it is clean and local energy."

"I like the reduced maintenance of an electric vehicle because I am not wasting time at the dealer for oil changes and repairs."

"I like that I can top off my battery every night at home in my garage and not have to pump gas in the cold."

Take Charge!

## OPTIONS TO MEET YOUR NEEDS

### Battery Electric Vehicles (BEVs)

A battery stores the electrical energy that powers the motor. EV batteries *are charged by plugging the vehicle into an electric power source*

### Plug-In Hybrid Electric Vehicles (PHEVs)

PHEVs are powered by conventional fuels and electrical energy stored in a battery that powers the electric motor. PHEVs *are plugged into an electric power source* to charge the battery, in addition to using regenerative braking and the internal combustion engine.

### Hybrid Electric Vehicles (HEVs)

HEVs are powered by conventional fuels and electrical energy stored in battery. They do not plug-in to charge.

## BENEFITS FOR YOU & THE ENVIRONMENT

- **Lower maintenance and operational costs—great news for your wallet**
- **Great for the environment—no tailpipe emissions**
- **Federal Tax credits may apply**
- **More space—EV powertrains require a lot less space which means more space and added foot room**
- **Quiet & Smooth—no gears to shift through or loud engine noises, accelerating is a breeze**
- **Skip the gas station & charge at home**

## NHEC IS HERE TO HELP

**Electric Vehicle Rebates:** Earn up to \$1000 when you purchase or lease a qualified EV

**Residential Charger Rebate:** Earn up to \$300 when you install a Level 2 charger at your home and take advantage of lower off-peak rates. (Charge between the hours of 9PM and 7AM)

**Commercial Charger Rebate:** Earn up to \$2,500 when you install a Level 2 charger at your business
